

REQUIRE HIRE

Get Interviewed. Not Just Listed.

An AI-Powered, Interview-First Recruitment Platform.

The Resume Black Hole is Broken for Everyone.

75%

of candidates never hear back after applying.

The Candidate Experience

- Applications disappear with zero transparency on their status.
- Endless resume submissions lead to no responses.
- Rejections come with no feedback for improvement.
- Job descriptions rarely match the actual role.

Hiring Teams are Drowning in Manual Work & Uncertainty.

75%

of candidates never hear back after applying.

The Candidate Experience

- Applications disappear with zero transparency on their status.
- Endless resume submissions lead to no responses.
- Rejections come with no feedback for improvement.
- Job descriptions rarely match the actual role.

The Employer Reality

- Hiring needs are scattered across disconnected emails and spreadsheets.
- Manual tracking wastes countless hours with no centralized view.
- Manual tracking wastes countless hours with no centralized view.
- Critical requisitions get stuck in long, untraceable approval chains.
- Untraceable approval chains.
- Resumes fail to reflect a candidate's true capabilities, leading to poor quality hires.

The Solution is a Shift in Philosophy: From Resume-First to Interview-First.

We believe the **interview should be the start of the conversation**, not the end of a long, biased filtering process.

Resume-First

Interview-First

Introducing: **RequireHire**, an AI-powered B2B SaaS platform that manages the entire recruitment lifecycle, from requisition to offer.

Skill-Based Matching

Move beyond keywords to actual, demonstrated skills.

Real-Time Status

Full transparency for candidates and hiring managers.

60% Faster Hiring

Streamlined workflows eliminate delays.

It All Starts with a 'Required Hire'.

What is a 'Required Hire'?

A formal, structured, and tracked request to fill a position. It is the single source of truth that initiates and governs the entire hiring process, replacing scattered emails and spreadsheets.

Why it Matters

- **Standardization:** A consistent format for all hiring requests across the organization.

- **Control & Approval:** Configurable approval chains (Manager → HR → Finance) prevent unauthorized hiring and ensure budget alignment.

- **Tracking & Compliance:** Creates a complete audit trail of all changes and approvals for planning and compliance.

- **Analytics:** Provides the data foundation for insights on hiring patterns, time-to-fill, and cost-per-hire.

Required Hire Lifecycle

The Employer Journey: From Chaos to Control.

The Candidate Journey: From Black Hole to Clear Pathway.

Candidates gain agency and transparency, transforming their job search from passive waiting to active engagement.

The Engine: AI-Powered Interviews and Skill Scoring

GPT-4o Powered Interviews: Candidates complete structured interviews that assess both technical and soft skills, providing far richer data than a static resume.

Objective Skill Scores: The AI analyzes responses to generate a quantifiable skill score, allowing employers to compare candidates fairly and consistently.

Bias Reduction: Initial screening is based on demonstrated ability, removing unconscious bias from the top of the funnel.

Privacy-First Design: Candidate profiles remain anonymized until they consent to share contact details, ensuring privacy and control.

Results That Matter: A Better Experience for Everyone.

For Employers

60% Faster Approvals: Digital workflows eliminate email delays.

Higher Quality Candidates: AI-screening delivers interview-ready talent.

Complete Visibility: Real-time dashboards on pipeline health.

Full Budget Control: Salary ranges are approved before sourcing begins.

For Candidates

Get Interviewed, Guaranteed: Showcase skills beyond the resume.

Fair & Unbiased Evaluation: Skill-based scoring provides a level playing field.

Full Transparency: Real-time status updates from application to offer.

Privacy First: You control when your personal details are shared.
